ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: SYSTEM TO FORM A LAYERING OF ELECTRONICALLY-INTERACTIVE MATERIAL

(57) Abstract: A machine controlled by a computer for depositing a liquefied electronically-interactive material on a sheet or support card, which includes: a base (1) to support the mobile bed (2) which is moved longitudinally (Y) by means of a worm screw (20) whose movement is controlled by a computer, and for the support and fixing of the said support sheet or card "S" on which the layer of electronically-interactive material is to be formed; a bridge above the said base with a transversal shaft (30) which also has a worm screw and whose movement is also controlled by the said computer, in which the transversal shaft (30) moves the said distribution unit for the electronically-interactive material to be deposited (3) in an orthogonal direction (X).
